

TariffMapper - Submission (paste into Google Docs)

Instructions: Select everything below the line, copy, paste into a new **Google Doc**, then apply your course template's title page / formatting if required.

TariffMapper - China <-> Indonesia Tariff Code Mapping (MVP)

Author: Yash Kataria

Submission date: May 2026

1. Demo video (Loom)

Video walkthrough: <https://www.loom.com/share/e41b9eeaede44342bdc956d59c907001>

2. Source code repository (GitHub)

Public repository: <https://github.com/Yash789k/tariff-mapper>

Clone (HTTPS): `https://github.com/Yash789k/tariff-mapper.git`

Clone (SSH): `git@github.com:Yash789k/tariff-mapper.git`

App location in repo: open the `tariff-mapper/` folder - Next.js app (`npm install, npm run dev`). Root-level `tariff-mapper.html` is the standalone reference prototype.

3. Written reflection

The **reflection** for this submission is **not duplicated here** so this cover sheet stays short. It appears in full in:

- **Markdown:** [BUILD_DOCUMENTATION.md - Sec.11 Reflection](#) (same section in the repo file `docs/BUILD_DOCUMENTATION.md`).

- **PDF bundle:** the reflection and related narrative are also covered inside the combined documentation PDF linked in Sec.4 below (`TariffMapper_Build_Documentation.pdf`).

4. Documentation & deliverables (links on GitHub)

Deliverable	View on GitHub
Technical build documentation (Markdown)	<code>docs/BUILD_DOCUMENTATION.md</code>
Phase 01 engineering build log	<code>docs/PHASE_01_LOG.md</code>
Full build documentation (PDF)	<code>docs/TariffMapper_Build_Documentation.pdf</code>
Browse all <code>"/docs"</code> files	<code>docs</code> folder on GitHub

Supplementary (optional): [MASTER SESSION LOG.md](#) - extended session notes; HTML mirror of build docs: [TariffMapper Build Documentation.html](#).

5. Note on PDF contents

Detailed architecture, prompts, limitations, deployment steps, and **reflection-adjacent discussion** are consolidated in **TariffMapper_Build_Documentation.pdf** and **BUILD_DOCUMENTATION.md**. Phase-by-phase implementation narrative is in **PHASE_01_LOG.md**. For grading, treat those PDF/Markdown sources as the canonical written submission beyond this cover sheet.

End of paste-ready submission cover sheet.
